

Section 17: Socio-Cultural

Variable: Income Status

Name	Description	Definition
fmlyinc	<p>Family Income</p> <p>Equal to fmlyincome if it is not missing, unknown, or refused. Otherwise, values of fmlyinc10k- fmlyinc100k are used to approximate the income level. Due to the structure of the questions and income ranges: 1) If only the lower limit of \$10K is specified, the middle range of \$16K-20K is assigned and 2) If only the lower limit of \$35K is specified, the income range of \$35K-50K is chosen. If no value is 'restored' but the individual income value is available and the family income is said to support 1 person, then the individual income value is used.</p>	<p>= fmlyincome, if fmlyincome \neq L,M or missing</p> <p>If fmlyincome = L,M or Missing = K, if fmlyinc100k = Y = J, if fmlyinc75k = Y & fmlyinc100k = N = I, if fmlyinc50k = Y & fmlyinc75k = N = H, if fmlyinc35k = Y & fmlyinc50k = N = G, if fmlyinc25k = Y = H, if fmlyinc35k = Y & fmlyinc50k \neq Y,N = E, if fmlyinc10k = Y & fmlyinc25k \neq Y,N</p> <p>= selfincome, if fmlysize = 1 & selfincome \neq L,M or Missing</p> <p>= Missing, otherwise.</p>
